PROJECTS

QR Code Generator
* Designed and developed a user-friendly web application utilizing HTML, CSS, and JavaScript to generate QR codes effortlessly.
* It takes input from user and Generates QR Code.

Netflix Clone
* Created a Netflix web page clone using HTML and CSS.
* The web page is a basic replica of the official Netflix website, with the same layout and design.
* A header section with the Netflix logo and a search bar.
* A main section with a carousel of featured movies and TV shows.
* A footer section with links to Netflix's social media pages and contact information.

Transparent Login Form
* Created a transparent login form using HTML and CSS, allowing for a modern and aesthetically pleasing design.
* Crafted a fluid design that adapts to different screen sizes and media types.

Simple Web page Design UI/UX
* Designed a simple webpage using Figma.
* The webpage has a header, main content area, and footer.
* The header includes the website's logo and title.
* The main content area includes a text block with some information about the website.
* The footer includes contact information and social media links.
